Note:

- The standard modules meet either EMI Class A or Class B with external components. For further information, please contact Polytron Devices, Inc.
- An external input filter capacitor is required if the module has to meet EN61000-4-4, EN61000-4-5. The filter suggested: The SWA9-12XX and SWA9-24XX recommended an aluminum electrolytic capacitor (Nippon chemi-con KY series, 220µF/100V) and a TVS (SMDJ70A, 70V, 3000Watt peak pulse power) to connect in parallel. The SWA9-48XX recommended an aluminum electrolytic capacitor (Nippon chemi-con KY series, 220µF/ 100V) and a TVS (SMDJ120A, 120V, 3000Watt peak pulse power) to connect in parallel.

CAUTION: This power module is not internally fused. An input line fuse must always be used.
